No. 41

Asked on 4 February 2020

MR S MINNIKIN ASKED MINISTER FOR EDUCATION AND MINISTER FOR INDUSTRIAL RELATIONS (HON G GRACE)

QUESTION:

With reference to the Advancing Clean Energy Schools program—

Will the Minister advise (a) if Belmont State School is currently considered as a priority for this program and (b) a timeframe for when the school can expect to see this implemented at the school?

ANSWER:

The Advancing Clean Energy Schools (ACES) Program is being implemented over three years with Phase 1 progressing during 2019–20.

Phases 2 and 3 of the ACES Program will progress during 2020–21 and 2021–22 respectively.

Belmont State School will benefit under the ACES Program and a scope of works will be developed following a site audit.

Under the ACES Program, delivery partners determine the tranche schedule for installations to allow them to effectively manage installations within each Department of Education region.

Planning for Phase 2 will commence in the weeks leading up to July 2020, when the next phase of the ACES Program is expected to commence and we will inform the Member accordingly.
