

Question on Notice
No. 1366
Asked on 10 November 2022

MR M BOOTHMAN ASKED MINISTER FOR EDUCATION, MINISTER FOR INDUSTRIAL RELATIONS AND MINISTER FOR RACING (HON G GRACE)

QUESTION:

Will the Minister advise, for each State School on the Gold Coast since 2015 (reported separately by year in table format) the (a) allocation of school maintenance funding, (b) number of buildings and structures within school grounds, (c) student capacity at each school and (d) day eight student enrolment numbers?

ANSWER:

(a) Allocation of school maintenance funding

Since 2015, the Department of Education has invested \$114.4 million (including GST) in school maintenance in the Gold Coast region. A breakdown of funding per school is provided at **Attachment 1**.

(b) Number of buildings and structures within school grounds

The department is unable to provide the historic data of buildings and structures since 2015, as the administrative dataset does not support historic reporting.

As at 17 November 2022, for the 76 state schools in the Gold Coast region, there are 1437 buildings and 1329 structures within school grounds.

The count of buildings and structures at Queensland state schools in the Gold Coast is provided at **Attachment 1**.

(c) Student capacity at each school

The built capacity data for schools in the Gold Coast region, using the data from the February bi-annual reports from 2019 to 2022, is provided at **Attachment 1**.

Consistent data sources to measure the built capacity of schools, which includes a validation and approval process, began with the first bi-annual report completed in February 2019.

Built capacity data prior to 2019 may be available; however, this may not be consistent nor comparable to current data and as such, has not been provided.

For reference, built capacity represents the total capacity of all teaching rooms in a school. The capacity of individual teaching rooms varies by type of room, taking into account details such as class size targets from the enterprise bargaining agreement, and health and safety considerations for specialist facilities.

Whereas, student enrolment capacity is influenced by a range of factors, including the number of learning spaces, how they are used and whether there is an Enrolment Management Plan (EMP) in place for the school.

Student enrolment capacity represents a moderated capacity figure considering a school's specific class size variability and room timetabling sensitivities (indicating that some rooms will not be used to full capacity all of the time).

Schools that have an EMP in place have their student enrolment capacity published online at www.education.qld.gov.au/parents-and-carers/enrolment/management-plans.

(d) Day eight student enrolment numbers

Day 8 enrolment figures for these schools have been provided in my response to Question on Notice 1324.

Statistics for Queensland state schools in the Gold Coast Region
