MR M BERKMAN ASKED MINISTER FOR ENERGY AND CLEAN ECONOMY JOBS (HON M DE BRENNI)

With reference to projected sea level rises and the Queensland Government webpage titled 'Sea level rise projection' last updated on 31 August 2018—

Will the Minister advise (a) if it is the department's current position that sea levels are projected to rise by approximately 0.8 metres by 2100, (b) any plans the department has to update these projections to account for more recent science including the IPCC's Sixth Assessment Report and (c) any work the department has done, including collaborating with the Planning Department and Environment Department, to take the current climate science into account?
