

Question on Notice
No. 1063
Asked on 17 September 2025

MS J PEASE ASKED MINISTER FOR POLICE AND EMERGENCY SERVICES (HON D PURDIE)—

QUESTION:

Will the Minister advise the total number of all proactive activities undertaken by the Queensland Police Service, including, but not limited to (for example), mobile police beat deployments, high visibility foot patrols, and deployments to identified crime hotspots (reported separately by category (e.g. police beat deployment), month and police district) for the 2024-25 financial year and the 2025-26 financial year to date?

ANSWER:

I have been advised by the Queensland Police Service (QPS) that the number of proactive policing activities undertaken during the 2024–25 financial year and the 2025–26 financial year to date include, but are not limited to, mobile police beat deployments, high visibility foot patrols, and targeted deployments to identified crime hotspots.

The data provided has been drawn from a range of proactive policing operations, including Operation Unison and Operation Marshall (high visibility operations), Operation Dextrous (statewide mobile police beat deployments), and wandering data collected during the reporting periods.

It is important to note that prior to the commencement of Operation Dextrous on the 6 January 2025, there was no specific mechanism for attributing mobile police beat deployments at this level of granularity.

Furthermore, proactive policing activity data is influenced by a range of operational variables, including district-level priorities, staffing availability, budgetary constraints, seasonal events, and the need to respond flexibly to emerging crime trends.

As such, fluctuations across districts and months are expected and reflect the dynamic nature of policing in Queensland.

It should be noted that the figures provided in the below tables above do not reflect those proactive activities which are captured as part of business-as-usual policing responses or other localised operations.

The figures provided in the below tables have been extracted from multiple QPS policing databases and represent the best available data.
