No. 20

Asked on 10 February 2026

MS M MCMAHON ASKED MINISTER FOR TRANSPORT AND MAIN ROADS (HON B MICKELBERG)—

QUESTION:

With reference to TMR completing an options analysis for upgrade options to the Beaudesert-Beenleigh Rd and Bannockburn Rd intersection at Windaroo in 2024, and noting the current QTRIP document indicates that planning is currently underway to install traffic signals with construction starting next financial year—

Will the Minister outline (a) what intersection upgrade option the government has selected, (b) the consultation process for affected stakeholders undertaken and (c) the budget estimate for the upgrade?

ANSWER:

I thank the Member for the question.

In dealing with the issues at this intersection, for which solutions were not funded for construction under the former Labor Government, the intersection upgrade is currently in the preliminary design phase. Upgrade options will be made available once detailed design is complete.

The Crisafulli Government will communicate the final project scope with the community once detailed design is complete. As planning is still progressing, budget estimates are not available.
